Summary

Computer Engineering undergraduate (CGPA: 9.06/10) at Savitribai Phule Pune University with hands-on experience building end-to-end machine learning pipelines, RAG-based LLM applications, and AI-powered data systems using Python, Scikit-learn, FAISS, Sentence Transformers, and Flask. Proficient in vector search, embedding models, and LLM integration (OpenRouter DeepSeek) with demonstrated ability to take projects from data preprocessing and feature engineering through model deployment and production. Seeking an AI Engineer, Machine Learning, or Data Scientist internship to deliver measurable technical impact.

Education

B.Tech in Computer Engineering	Aug 2023 – Present
Savitribai Phule Pune University, Baramati, India	CGPA: 9.06 / 10.0
Higher Secondary Certificate (HSC)	Mar 2023
Yashwantrao Chavan Institute of Science and Jr College, Satara	81.50%
Secondary School Certificate (SSC)	Mar 2021
Shreemant Shivajiraje English Medium School, Phaltan	93.40%

Projects

LexiMind – RAG-Based Research Copilot	GitHub
<i>Python, Streamlit, FAISS, Sentence Transformers, OpenRouter API, NLP</i>	
- Built an end-to-end Retrieval-Augmented Generation (RAG) system combining web search and PDF ingestion to generate structured AI responses using LLMs. - Implemented FAISS vector search with Sentence Transformers for semantic retrieval of relevant document chunks. - Integrated OpenRouter API (DeepSeek) for context-aware response generation including summaries and insights. - Developed Streamlit UI with PDF upload and automated research report generation using ReportLab.	
PhishHook AI – Phishing Detection System	GitHub
<i>Python, Scikit-learn, Random Forest, Feature Engineering</i>	
- Built a Random Forest classifier for phishing detection achieving 96.4% accuracy on 11,000+ URLs. - Engineered 30+ URL features including lexical patterns, domain structure, and WHOIS data. - Improved precision by 18% through feature optimization and reduced false positives by 62%.	
SearchBoost AI – SEO Analytics Platform	GitHub
<i>Python, Scikit-learn, Random Forest, Flask, Streamlit</i>	
- Built ML pipeline to predict SEO rankings using 15,000+ webpages with 92% accuracy. - Designed Flask + Streamlit dashboard for automated SEO analysis and insights. - Reduced manual SEO effort by 78% using predictive ranking system.	

Certifications

Google AI	<i>Google</i>
Bootcamp in Artificial Intelligence	<i>C-DAC India</i>
Python for Data Science	<i>NPTEL – IIT Madras</i>
Claude Code 101	<i>Anthropic</i>

Technical Skills

Languages: Python, C++, Java, JavaScript, HTML, CSS
AI / ML: Scikit-learn, Supervised Learning, Classification, Regression, Feature Engineering, Data Preprocessing, NLP, Text Preprocessing, Sentence Transformers, Embedding Models, Model Evaluation PyTorch
GenAI / LLM: RAG Pipelines, FAISS Vector Search, LLM Integration, Retrieval-Augmented Generation(RAG), Vector Databases, Prompt Engineering
Data Analytics: Pandas, NumPy, Matplotlib, Data Pipelines, Power BI, Excel, Data Visualization
Web Frameworks: Flask, Streamlit, Django, FastAPI, Node.js
Databases: MongoDB, MySQL, PostgreSQL
Tools DevOps: Git, GitHub, Docker, VS Code, Postman, Render
Core CS: Data Structures & Algorithms (DSA), OOP, DBMS, Operating Systems, Computer Networks

Achievements

- Hackathon Participant**, 24-Hour National-Level Hackathon organized by **Cummins** at the College of Engineering, Phaltan (October 9, 2025); designed and prototyped a working technical solution under sprint conditions, competing against teams from institutions across Maharashtra.
- Academic Distinction:** Maintained a CGPA of **9.06/10** in B.Tech Computer Engineering at Savitribai Phule Pune University, ranking consistently among the top performers in the department.

Additional

Soft Skills: Communication, Adaptability, Problem-Solving, Time Management
Languages: English (Proficient) | Hindi (Proficient) | Marathi (Native)
